# SEED CORN

Test your seed corn, and if it isn't good I can help you out.

The SEED CORN situation is CRITICAL this year.

I have an expert "dirt farmer" that is preparing our CORN for us, and we will be ready to offer you some GOOD high germination corn at reasonable prices, within a short time.

We will have four or five of the most popular varieties to offer.

The corn will be tested and we will tell you the germination on each variety.

Part of this corn was grown in 1922 and part of it in 1923.

Samples will be sent later if you wish.

All this corn was grown within 50 miles of Fremont, Nebr., and will be sold strictly on its merits, and you can be the judge.

# SOY BEANS

You should know more about this crop, because it is coming in favor more and more every year.

They make a good fertilizer for the soil.

As silage, or hay, they are hard to beat.

For "hogging down" they make bone and muscle.

I offer the AK-SAR-BEN (Nebraska)—having originated at the Nebraska Experiment Station several years ago, and being highly recommended, as being one of the best.

The reports from over the State are uniformly favorable to this variety.

Its chief characteristics are as follows:

Early maturing, ripening in 110 days or less.

The seeds are large, of rich buttery color.

The plant stands erect, attaining 2 feet in height.

Pods are very numerous, and well filled.

Plant with your corn, or may be planted alone.

Genuine "CERTIFIED" seed is the kind I offer.

If you want to see a "tickled" hog or sheep, just turn him into a patch of AKSARBEN BEANS.

Price, 75¢ per lb., or \$3.60 for full bu.

YAGER NURSERY & SEED CO.,

FREMONT, NEB.

# Yager Nursery & Seed Co.

Fremont Nebr.

( A PERSONAL LETTER FROM YAGER. )

Dear Friend--: I am sending you my SEED & NURSERY BOOK, and hope you will be interested in reading it.

Thousands of people have secured their FIELD SEED & NURSERY stock of me in years past, and they must have been satisfied, or they would not buy of me from year to year.

In FIELD SEED you naturally want to get the best seed possible for the money, so with this idea in view, I buy large quantities for CASH, so that I can sell to you at lower prices.

When I buy a carload of Alfalfa seed, I save on the Freight, and get the Quantity price, and in turn can make YOU lower prices, because I handle it in such large quantities.

My SEED & NURSERY stock are sold on their merits, that is, PRICE and QUALITY, and I leave it to you to be the judge.

It costs me about 10c to send you this little book and tell you about my TREES & SEED, and this is my ONLY SALESMAN.

When you buy of me, you are not paying any Hotel bills, no Cigar bills, no Gasoline bills, and for no THEATER tickets.

Everybody works here, even "Father," and nobody wears a silk shirt either, No sir; our motto is good honest hard work, and SATISFACTION to the CUSTOMER.

Some nurseries don't seem to know that the "war is over" (judging from their prices), but the fact is, that it is the SALESMAN, that gets the big fat profits, so the moral is plain, "BUY DIRECT & SAVE THE BALANCE."

My GUARANTEE protects you, for if you are not satisfied, "we trade back even" and will still be the best of friends, I guess that is about fair, don't you think so?

I thank you for reading my letter.

*Joseph A. Yager*
